

ENVIRONMENTAL POLICY

The management of MAGYARMET Finomöntöde Ltd. early recognized the importance of protecting the environment, preventing pollution, using environmentally friendly materials and products, continuously improving product quality. In addition to the actual reduction of the environmental impact of the company's activities, this also has a positive impact on efficiency, improves the company's image, and ultimately is an important condition for ensuring profitability and competitiveness. Also, the environmentally conscious operation and sustainable development of technology used today will influence the present of future generations. The scope of the environmental policy is wax casting, precision moulding and machining.

To achieve this, we are committed to the following:

1. We pay great attention to the economical usage of the environmental resources and try to eliminate harmful effects or if its possible, completely terminate them.
2. With the circular economy in mind, we strive to keep a product, its components and materials in the economic circulation as long and as high quality as possible, and consequently reduce the need for new raw materials.
3. We continuously assess and identify remaining adverse environmental impacts, and try to prevent, minimise and eliminate them.
4. We also give priority to the beautification of our environment, so the landscaping of the garden, the care and maintenance of the plants are carried out with the help of professionals, thus increasing the comfort of our employees and guests. We also contribute to reducing the impact of CO2 emissions, increasing local adaptability to climate change.
5. We continuously train our employees to encourage them to protect the environment and prevent harmful environmental impacts. With effective communication we promote environmental and health-conscious behaviour.
6. We want to maintain flexible and open communication with the authorities, our partners, the council and the public.
7. We monitor the environmental performance of our service providers and subcontractors through customer audits, and encourage them to comply with our principles.
8. We aim to continuously reduce the amount of hazardous and non-hazardous waste generated and we increase recycling through selective waste collection.
9. When purchasing new technologies or upgrading existing ones, we take sustainability aspects into account and the potential of renewable energy sources.
10. By continuously improving our activities we contribute to reach Hungary's climate goals.
11. We support the achievement of safe and reliable operations through continuous maintenance of our air pollution point sources.
12. We continuously review our operations, setting and implementing targets and programmes to ensure continuous improvement of our environmental performance.
13. When carrying out our activities, we strive to comply with the applicable laws and regulations to meet the requirements of the MSZ EN ISO 14001: 2015 standard and other expectations.
